DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1.. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

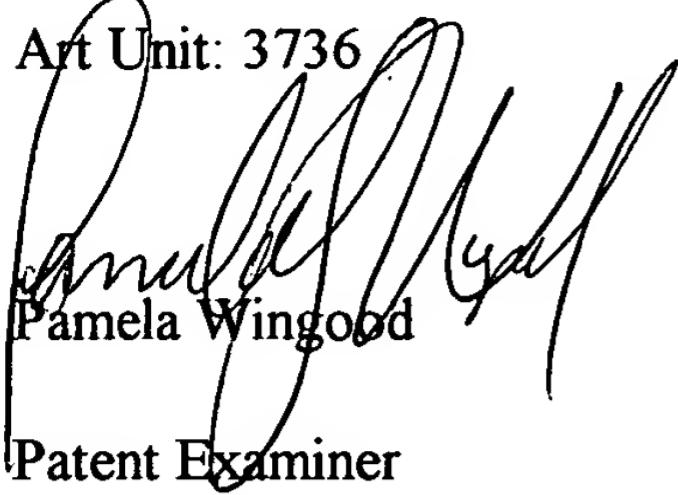

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 32-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Baum.

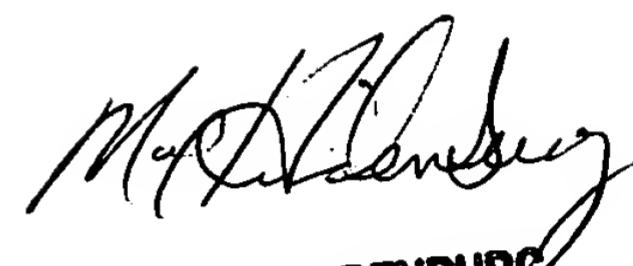

Baum discloses a probe tip cover having a tubular conical shape (Figs. 1, 3 and 5), an outer and an inner surface shaped to receive probe (14), a first end and a second end defining an inner continuous passage, a plurality of back angling flexible annular flanges (41-43) that are perpendicular at the point where they join the tube, a tip at (33) at the second end, and an outer surface diameter increasing in the direction toward the second end. A middle element (42) along the body portion. The flexible probe tip is of rubbery elastic (Claim 1), a polymer and the inner portion near (22) and (14) show a curved chamfer surface in Fig 4, near (12-1). Additionally, tip is capable of being disposed. There is a ring located at the proximal end of the device at Fig. 5.

NOTE: Applicant should include the first two publications in the next Office Response so that they may be considered.

Any question regarding this application can be addressed to Pamela Wingood who can be reached on (703)308-2676.
